

Community update on water and wastewater works

March 2025

What's happening?

SA Water is working with the State Government over the next 4 years to expand its water and wastewater network to enable housing growth in Adelaide's north.

As part of the State Government's Housing Roadmap, SA Water is investing \$1.2 billion to undertake the biggest upgrade of its network in decades, including installing 25 km of water mains, 43 km of wastewater mains, 4 pumping stations and 2 water storage tanks.

Why is this work important?

These upgrades will support South Australia's housing growth, providing reliable water and wastewater services to over 11,000 new homes while keeping your services running smoothly. It's an important step in building sustainable, thriving communities now and into the future.

Where will SA Water be working?

The work is focused on Adelaide's northern suburbs, including Angle Vale, Elizabeth North, Davoren Park, Blakeview, Munno Para, Andrews Farm, Virginia, and Gawler East. Rapid housing growth is happening in or around these areas, and we need to expand and upgrade water and wastewater infrastructure to support these communities.

Minimising disruption

SA Water will work closely with local communities, keeping you informed, and ensuring construction is completed safely and with as little disruption as possible.

Munno Para Downs to Andrews Farm

Date	Work
March 2025 to late 2025	Works along Andrews Road and Angle Vale Road, between Andrews Road and Stebonheath Road

Gawler East and surrounds

Date	Work
January 2025 to late 2025	Water pipeline installation along Martin Road
May 2025 to late 2025	Works on Sunnydale Avenue, moving north

What to expect

- most works will take place Mondays to Fridays from 6am to 5pm and on some Saturdays
- minor delays, traffic changes and detours, and some noise, vibration and dust
- some night works.

To find out more about the traffic interruptions in your area visit **watertalks.sawater.com.au**

Did you know?

We've already laid more than 1,500 metres of new water pipes under Supple and Angle Vale Roads!

The new water and wastewater trunk mains can be up to 1.2 metres wide, weigh 6 tonnes each, and are installed up to 6 metres underground.

Your questions answered

Why are some roads closed?

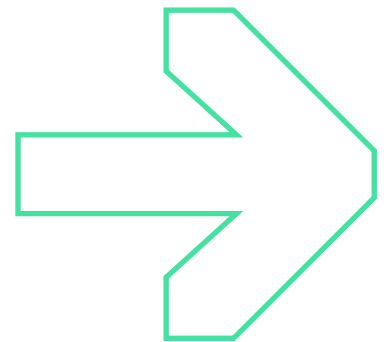

We will need to close some roads to keep workers and the community safe. We're working as quickly as we can to finish.

How will this work help me?

These upgrades will ensure your water service stays reliable as our community grows.

Will my water be turned off?

Most customers won't experience water supply interruptions, as much of the work involves duplicating existing trunk water mains. Residents will be notified if any interruptions occur.

Want to chat?

We're always happy to hear your questions and feedback.

Visit the SA Water Water Talks website to find out when the team will be in your area and to register for updates.
