

20 April 2026

Hello

SA Water Site Compound Set up – Bordertown Growth Project

Together with our contractor John Holland Guidera O'Connor Joint Venture (JHGOJV), we will be establishing our Project site compound in the industrial estate on Cannawigara Road, Bordertown at the location of the new tank site.

The Bordertown Growth Project will significantly upgrade Bordertown's water supply infrastructure to enable ongoing growth. Full project works are scheduled to commence in late May 2026.

The site compound will provide offices, amenities and carparking for our staff, and laydown areas for machinery and storage of construction materials.

What to expect

Site compound work is expected to commence Monday 27th April and is scheduled between 7am and 5pm, Monday to Friday.

Following the completion of our site compound establishment in early May 2026, earth works will commence in preparation for the new tank installation.

The work may cause some temporary noise and dust; measures will be in place to reduce disruptions as much as possible.

There will be no disruption to your water supply while these setup works are undertaken.

Please see the map overleaf for the new water tank and site compound location.

Keeping you updated

If you want to know more about these works, please contact us on **1300 729 283** (option 1) or email project@sawater.com.au

You can also visit our WaterTalks page for this project via the QR code and sign up for updates.

Thank you for your patience and understanding whilst we improve the water supply network in your area.

Kind regards,

Laura Jones
