

18 February 2026

Hello

SA Water Wastewater Upgrade Works in 2026 – Lawrie Street and Cudmore Terrace, Henley Beach

Together with our delivery partner, John Holland Guidera O'Connor Joint Venture (JHGOJV), we will be undertaking a major upgrade of wastewater infrastructure near the school during 2026. These works are essential to ensure we can continue providing reliable wastewater services into the future.

When is it happening?

Phase 1: Installation of a new 400-metre wastewater main, along Lawrie Street and Cudmore Terrace, is scheduled to occur between late February and June 2026.

Phase 2: Upgrade of the wastewater pump station at the corner of Cudmore Terrace and Hill Street (previously scheduled for 2024) will now take place from approximately June 2026 to February 2027.

Please refer to the overview map on the next page for more details. The work will be delivered in stages throughout the year.

What to expect during phase 1 (Lawrie Street and Cudmore Terrace - late February 2026 to June 2026.)

- **Traffic Management:** For the safety of the community and our crews, staged traffic management will be in place on Lawrie Street and Cudmore Terrace. This will include full road closures and detours at different stages as we install the new wastewater main from east to west. Please observe traffic signage in place.
- **Lawrie Street Kiss and Drop and Staff Car Park Access:** The Kiss and Drop and staff car park will only be accessible **via a permit** that the College will issue to families of students with additional needs. The staff car park will remain open for staff. Access to this car park will alter at each stage of the works.
- **Lawrie Street footpath closure:** To maintain wastewater services while existing infrastructure is offline, a temporary above-ground pipe will be installed and fenced off along the southern footpath of Lawrie Street. The footpath will be closed for the duration of phase 1. The footpath on the northern side of Lawrie Street will remain open. The pedestrian crossing and adjacent pedestrian gate will remain open.
- **No parking on Lawrie Street:** There will be no parking on both sides of Lawrie Street.
- **School bus stops:** The school bus stops on Lawrie Street will move to stop 28 on Marlborough Street. This new bus stop will be in place for all of 2026 (see map).
- **Bike parking:** Access to the existing bike parking compound will be maintained via a new path from Mitton Avenue due to the Lawrie Street closure.
- **Site compound:** The project will be using the northwest corner of the College oval as a site compound. This area will be fenced off for safety.

Keeping you updated

If you have any questions or would like more information, please contact us on **1300 729 283** (option 1) or email project@sawater.com.au

You can also visit our WaterTalks page for this project via the QR code and sign up for updates or ask questions.

Thank you for your patience and understanding as we work to improve the wastewater network in your area.

Kind regards,

Laura Jones
Stakeholder Engagement Adviser
