

2 January 2025

Gawler Tank Upgrade

Our water storage tank at 81 Calton Road, Gawler East is over 100 years old and nearing the end of its operational life. We are committed to providing the Gawler region with a reliable water supply and will be demolishing and rebuilding a new tank in 2025, doubling its storage capacity. The new tank is expected to be completed in early 2026.

Phase One: Demolition

Demolition works will take place from **late January to late April 2025**, during standard working hours: **7 am – 5 pm, Monday to Friday**.

What to expect:

- **Water drainage:** Before demolition begins, the tank will be drained. Whilst the majority of the water will be redirected into the network, the remaining amount will be recycled into the stormwater network. You may notice water on the road as result of this.
- **Noise:** Elevated noise levels are expected during demolition, particularly during the cutting of concrete.
- **Traffic impacts:** Barossa Avenue (between Calton Road and Popham Avenue) will be temporarily closed from **Monday 13 January 2025**. Detours via Trevu Avenue will be in place, with traffic management and signage provided. Access will be maintained for residents on Barossa Ave opposite the worksite. A detour map is provided on the reverse side of this letter
- **Dust:** As a result of concrete cutting, some dust is to be expected. Dust suppression measures, including regular street sweeping and water spraying, will be implemented to minimise impacts on the surrounding community.

We are committed to minimising disruption and appreciate your patience and understanding as we carry out this important work.

Project updates:
