Ref: METRO GROWTH

Dear Resident/Property Owner,

SA Water works on Brooks Road, Buckland Park

As part of the State Government's Housing Roadmap we're investing \$1.5 billion over 4 years to grow and expand our water and wastewater networks to enable an estimated 50,000 homes to be built across South Australia, while ensuring reliable services for everyone.

In 2026, we will be installing new wastewater infrastructure under and along Brooks Road to secure high quality, reliable services for existing customers and support future housing growth in Riverlea Park.

This essential work will strengthen the community's infrastructure, ensuring it meets the needs of current and future residents.

During construction

We understand that construction works can be disruptive, and we are committed to keeping you informed throughout the project. To minimise any potential inconvenience, we will:

- **provide advance notice** of any works happening near your property
- **contact you** with detailed information if the works will have a direct impact to your property

Next steps for major upgrade

In February, together with our contractor BMD, we will undertake investigation works along the alignment on Brooks Road and on the verge. Working hours are 7.00am – 5.00pm, Mondays to Fridays with stop and go traffic management in place at times.

What's next.

To register for future updates about these events or updates about the project in general, please scan the QR code or visit **watertalks.sawater.com.au** for more information.

Keeping you updated

If you have any immediate questions or enquiries, please don't hesitate to reach out to our project team via

Email: metrogrowth@sawater.com.au

Phone: 1300 981 233

We look forward to working with you throughout the construction period.

Kind regards,

Metro Growth Stakeholder Engagement Team
