

Date: 27 February 2026

Ref: Metro Growth

Hello

Works in your area

Together with our delivery partner BMD, we will be installing new wastewater pipes and a new pump station on Brooks Road as part of major network upgrades.

Works are scheduled to begin in late March 2026 on Brooks Road near Symes Road and move progressively North, with completion expected mid 2027. These dates are subject to weather and on-site conditions.

What to expect:

To keep everyone safe while we complete these essential Works, road closures and detours will be in place. Crews will be working in multiple locations at the same time to complete these works as quickly as possible.

We understand that construction works can be disruptive, and we are committed to keeping you informed throughout the project. To minimise any potential inconvenience:

- any night works being undertaken at the intersection with St Kilda Road
- Brooks Road will remain open to local traffic
- we will provide advance notice of any works happening near your property and contact you with detailed information if the works have a direct impact to your property

During working hours there will be some potential noise, dust and vibration. Speed restrictions and traffic detours will be in place (refer to the QR code for specific detours). Please follow detour signage on-site, noting detours and closures will change as works progress.

We will endeavour to complete these works as quickly as possible with minimal impact to the community. Restoration of any roads, footpaths or the environmental areas impacted by our works will be completed once it is safe and practical to do so.

More information

These works are part of our \$1.5 billion investment in building and upgrading water and wastewater infrastructure to support housing growth in South Australia. New and upgraded infrastructure is required to provide reliable services to both existing customers as well as new and future customers, particularly areas on the edge of our existing networks.

Keeping you updated

If you have any questions about these works, please contact:
