

6 February 2026

Hello

New Water Pump Station – The Vines Drive, Normanville

Following our recent correspondence about upcoming water infrastructure upgrades in the Wirrina Cove area, we are writing to provide further information specific to planned works at The Vines Drive, Normanville.

What's happening

As part of SA Water's broader water infrastructure upgrades in the region, a new water pump station is planned to be constructed at 1 The Vines Drive. This pump station will form part of the new trunk main and storage system designed to improve water quality, strengthen network reliability and support future growth.

Figure 1 - Pump Station location

When it's happening

Early investigation works

Early investigation works are expected to commence from mid-February 2026. These works will help inform the final design of the pump station and will include:

- Establishment of a temporary site office at 1 The Vines Drive
- Installation of temporary fencing around the site
- Geotechnical investigations and site surveys

You may notice intermittent, low-impact construction-style activities during this period. Works will occur between 7:00am and 5:00pm, Monday to Friday.

Construction Timeframes

This project is still in the early planning phase.

Construction of the pump station is currently forecast to commence in Spring 2026, subject to final approvals. On-site activities will continue intermittently through 2027.

What to expect on site

During investigation and construction phases, you may notice workers, equipment and vehicles accessing the site from time to time. At this stage, the pump station remains in the design phase, and no final decisions have been made regarding its appearance, layout or fencing.

We understand the importance of how infrastructure integrates into the local environment and will provide further updates once more detail is available about the final design and boundary treatments separating the site from public areas. You will have the opportunity to provide feedback.

Keeping you updated

We appreciate your patience and cooperation during these essential works. If you have any concerns or require assistance, please contact me on the details below.
