

13 October 2026

SA Water Wastewater Infrastructure Upgrade

We are currently in Phase One Stage Four, with the installation of the new wastewater main on Cudmore Terrace and Hill Street and then connection of the new pipework to the network.

From 19 October, we will be carrying out works on Lawrie Street between Mitton Avenue and Northey Avenue to connect the new wastewater pipe to the existing network. This is an important step that will allow the new infrastructure to be brought into service. To safely complete this connection, we will temporarily take part of the existing wastewater network offline and use the above-ground bypass pipeline while the works are underway.

The temporary pumps used to operate the bypass pipework at the Cudmore Terrace Pump Station will be switched back on for approximately **six weeks**. Noise levels are expected to be similar to those experienced during previous works. To help reduce noise impacts, the noise barrier wall will remain in place, and a smaller pump will be used overnight. Please note that the timing of the smaller pump's operation may vary each night depending on wastewater levels as previously. Cudmore Terrace will remain closed during this time.

For the connection works, **a section of Lawrie Street between Mitton Avenue and Northey Avenue will be closed in both directions for approximately three weeks**, weather permitting. Works will be undertaken Monday to Saturday, from 7:00 am to 5:00 pm. During the **first week**, one lane of Lawrie Street will reopen to traffic outside of working hours. During the **second week**, the road will remain closed in both directions, including outside of working hours, within the work area shown on the map on the next page. On the **third week**, following completion of the connection works, the southern lane of Lawrie Street between Mitton Avenue and Northey Avenue will remain closed while asphaltting works are completed.

Detours will be in place via Northey Avenue only. Please follow signage and the instructions of the traffic controllers on site. Please see the map on next page for further information.

For residents on Cudmore Terrace and the eastern side of Lawrie Street, there may be times when construction activities are taking place in front of your property. Rest assured, we will not permanently block access to your property and will move our machinery when needed. To avoid any potential delays while equipment is being moved, we recommend parking your vehicle on a nearby street before 7:00 am.

Looking ahead

Following completion of these works, Lawrie Street will re-open to two-way traffic and the project will move into Phase Two – **Pump Station Upgrade**.

Keeping you updated

If you have any questions or would like more information, please contact us on **1300 729 283** (option 1) or email project@sawater.com.au

We will write to you again to provide an update on arrangements for Phase Two of the project.

You can also visit our WaterTalks page for this project via the QR code and sign up for updates or ask questions.

Thank you for your patience and understanding as we work to improve the wastewater network in your area.

Kind regards,
Laura Jones
Stakeholder Engagement Adviser
